## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 9-39 are allowed.

The following is an examiner's statement of reasons for allowance: the closest prior art of record fails to teach a capacitive sonde used for continuously detecting an interface position of the fluids in the vessel being externally connected to a measuring device through a rotatable connector as claimed. Fleury teaches a similar device in which an acoustic measurement system is used, however does not teach alone or in combination with the Cox reference reason to combine or replace the acoustic sonde with a capacitive one to measure the displacement of the interface as claimed. As such it would not have been obvious to modify the references in any manner to arrive at the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
